Barefoot	Every SAT / WED Oct-June	Lilac Hill

RULES / GUIDING PRINCIPLES – BURSWOOD

On Season Period – (1 Sep to 30 April)

- During scheduled HIT club tournaments where tournament activities are underway **NO** others users are permitted in Areas 1, 2 or 3 (permission for use by others maybe granted by HIT club on the day at HIT clubs specific judgement an discretion).
- During scheduled HIT club or Disabled tournament training other division members may use alternate areas at Burswood to that occupied by the HIT or Disabled training activity. Communication with those training as to your use of an area should be provided as courtesy. Other divisions using the alternate areas must ensure that their activities do not impact on the tournament training water quality in any manner. A spirit of respect and co-operation must exist.
(Note: the above assumes that areas are vacant. If HIT club or Disabled are occupying 1, 2 or 3 of the areas then they have priority use for this scheduled period)
- Tournament or Disabled competition or training activities are defined as Slalom (through either slalom course north or south of the causeway bridge), Jump (over either jump) and Trick Ski. Tournament training does not include tournament or disabled people skiing by any other means (discs, tubes etc).
- Outside scheduled tournament or disabled competition or training timeslots other division users must respect and share the resource. Tournament or Disabled members do not have the right to prevent shared use of the area by other divisions during these unscheduled periods. Negotiated and shared use of the areas which respects tournaments needs for slalom or jump passes must prevail. Tournament and Disabled must manage this carefully and not seek sole use.

Off Season Period – (1 May to 31 Aug)

- For Disabled and Tournament groups scheduled training and scheduled competition activities shall be limited to periods relative to the competition season (the ON season). A winter recess period where no training or competitions are scheduled will be nominated from 1st May to the 31st Aug. During this period all divisions have shared use of the areas for general training.

Recurring Training Dates

- Recurring training dates will only apply during the ON season, not during the OFF season.
- Recurring training dates from all disciplines will be considered. Tournament (HIT club) and Disabled are recognised as having special needs given the specialised facilities at Burswood for both their disciplines.
- The Burswood Management group charged with managing the area will seek to ensure that all divisions have adequate training application opportunities that leads to an agreed annual calendar of scheduled activities which delivers high levels of regular usage, making a significant contribution to the development of water skiing in Western Australia.

Nominated Primary Use Timeslots

- All disciplines (be they Tournament, Disabled, Show ski, Barefoot or Wakeboard) require nominated “ primary use timeslots “ where they are not sharing water with other divisions, so that quality, unrestricted and unimpeded training or competition can occur.

This proposal supports this “primary use timeslot ” concept for Tournament Competition and Disabled Competition. (Barefoot division has Lilac Park for such primary use). Show Ski and Wakeboard divisions require primary use timeslots leading up to key display or similar dates to ensure adequate training can be undertaken. Sharing with others in the past has led to limited water time, poor water quality (even in show ski terms) and friction with other discipline users.

Future calendars should recognise the need for and feature “primary use timeslots” for divisions.

(the term “primary use timeslots” was recognised as “gazetted timeslots” in some people minds. For clarification this has been recorded here.

Show Ski used the example whereby it has 3 major shows per year and requires a single day primary use practice timeslot before each show to adequately prepare and practice.)

Limit on boat numbers

Outside of scheduled activities for any division a policy of a maximum of two boats per division operating across all three areas at Burswood at any one time is to be maintained.

Defining the 3 basic ski areas at Burswood

- **AREA 1** – the area encompassing primary ski course and jump, includes passage through the bridge and return to facilitate use of the primary ski course.
 - During scheduled tournaments it is necessary to prevent any other boating or skiing activities in areas 2 and 3 to preserve the absolute best quality water for tournament participants.
(HIT club may allow use by others however this is by permission and at the discretion of HIT club on the day)
 - During scheduled tournament training activities areas 2 and 3 can sustain skiing activities where drivers in these areas respect the need to act in a manner which preserves high quality water in area 1 for the tournament training activity.
 - Outside scheduled tournament competition or training activities any division skiing in or through area 1 shall respect the primary ski course and jump and shall not use these facilities or endanger their well being.
- **AREA 2** – the area south of the bridge (includes secondary jump and slalom course).
 - During scheduled Disabled competition where competition activities are underway **NO** other users are permitted in area 2.

- During scheduled Disabled training where training is underway other divisions can use areas 1 and 3 ensuring that their activities are in harmony with the Disabled training activity.
 - Outside scheduled training and competition activities in area 2, other divisions skiing in or through the area shall respect the Disabled dock and shall not use the slalom and jump facilities or endanger their well being.
- **AREA 3** – area in front of club house loosely defined by the power boat race course.
 - Outside of scheduled tournament competition in Area 1, or speedboat / dingy scheduled events other divisions may use this area for training. Care and respect must be maintained to ensure that activities in area 3 do not impact others. Facilities such as power boat markers, show ski dock etc shall not be endangered by the users actions or activities.
